WHO WE ARE

The Industry Council for Emergency Response Technologies (iCERT) is the only industry trade association focused exclusively on emergency response technologies and related equipment, systems, and services.

The Mission of iCERT is to drive innovation in the emergency response sector and to promote industry growth through increased investments in new technologies.

The Members of iCERT are the nation's leading public safety communications technology companies, including manufacturers, software developers, systems integrators, service providers, and others.

"T-Mobile's membership in iCERT has been nothing short of exceptional. The level of dedication, expertise, and professionalism that iCERT and its member companies bring to the table is truly remarkable. Their supportive peer network, advocacy opportunities, and industry-specific resources are indispensable to my work, as well as that of my colleagues. iCERT's member companies' commitment to ensuring the safety and well-being of our communities is evident in everything they do, and it is a privilege to work alongside them."

Eric Hagerson
T-Mobile

iCERT

...facilitates collaboration among our members, the public safety community, and various stakeholders interested in improving emergency response.

...advances Federal and State public policies that will bring about improvements in emergency response

...develops best standards and practices for the industry.

Empower Public Safety, Together.™

BENEFITS

iCERT members have exclusive access to several unique resources and opportunities:

- **Receive daily Bid/RFP Business Leads/Proposals from Deltek/ GovWinIQ**

- **Advocacy Opportunities**

- **Participation in Semi-Annual Meetings**

- **Unique Member-to-Member Industry Meetings and Events**

- **Member-Driven Educational Webinars and Podcasts**

- **iCERT Member Newsletter delivering industry-specific news and content weekly**

ADVOCACY

Advocacy to shape the industry and directly influence legislation and regulation affecting it.

Policy Platform:
iCERT's members lead the charge to advance public policy.

Policy Goal:
Support State and Federal policies that promote the widespread adoption of advanced technologies which improve emergency response and increase public safety.

iCERT seeks to achieve this goal by supporting policies that:

- **Increase Funding for New Technologies**
- **Promote Effective Technology Policies**
- **Promote Open Standards Interoperability**
- **Protect Against Cyber Threats**

NETWORK

The iCERT network promotes collaborative working relationships. Our primary focus is to provide an environment in which our member companies can network with one another and work together to solve problems.

In some cases, this collaborative interaction has resulted in forming strategic business partnerships between our members, enabling them to achieve key business objectives.

The driving forces behind our network are the iCERT Committees and Working Groups:

- **Policy Committee**
- **Marketing Committee**
- **Interoperability Working Group**
- **Cybersecurity Working Group**
- **Innovation & Technology Committee**
- **Small Member/Entrepreneur Committee**
